DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- 1. Claims 1-14 are rejected under 35 U.S.C. 102(b) as being anticipated by Bawa (US 4,702,574).

Bawa discloses contact lenses that are colored with fluorescent colorants (Column 1, lines 8-10) wherein the fluorescent dye or pigment fluoresces in daylight (Column 2, lines 32-34 and 39-41) and wherein another portion of the contact lens contains a white reflective pigments such as titanium oxide. The florescent colorants used in the lenses may be pigments or dyes and are capable of fluorescing in a carrier resin (Column 3, lines 49-55), i.e., they reflect at certain wavelength of visible light (Column 4, lines 1-6). Examples include coumarins and phthalocyanine dyes (Column 4, lines 35-50). The colorant is mixed in a polymer at a range of about 0.2 to 8 weight percent (Column 6, lines 38-40 and 46-51) and may have a particle size in the range of 0.175 to 20 nm (Column 7, lines 1-5). With regards to the limitations of claims 6 and 7, the Examiner takes the position that the phrase "are produced by milling organic pigments with milling media having a particle size less than about 0.3", simply recites a process limitation and the resulting product is identical to one disclosed by Bawa. All limitations of claims 1-14 are disclosed in the above reference.

Application/Control Number: 10/661,964

Art Unit: 1773

2. Claims 1, 2, 6, 7, 11, 13, and 14 are rejected under 35 U.S.C. 102(b) as being anticipated by Hayes et al. (US 4,472,479).

Hayes et al. disclose fluorescent printing ribbons, which have a reflective pigment therein (Column 1, lines 11-15). To prepare the ribbon, layer of wax or other suitable medium and fluorescent material is deposited on the ribbon base, which may be a thin film of plastic, and a reflective barrier material is added to this layer or deposited in a second layer of wax upon the first layer. The barrier pigments used are pigments of finely divided metals or materials with metallic colors which are reflective and do not shift the wavelength of the fluorescent light (Column 2, lines 1-4). The pigments are finely divided pigments of reflective material which do not shift the wavelength of fluorescent light and examples include mica platelets coated with titanium oxide. The fluorescent material is a mixture of fluorescent dyes suspended in a polyester resin (Column 3, lines 40-55). With regards to the limitations of claims 6 and 7, the Examiner takes the position that the phrase "are produced by milling organic pigments with milling media having a particle size less than about 0.3", simply recites a process limitation and the resulting product is identical to one disclosed by Hayes et al. All limitations of claims 1, 2, 6, 7, 11, 13, and 14 are disclosed in the above reference.

Conclusion

3. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Sheeba Ahmed whose telephone number is (571)272-1504. The examiner can normally be reached on Monday-Friday from 9am to 5:30pm.

Application/Control Number: 10/661,964

Art Unit: 1773

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Paul Thibodeau can be reached on (571)272-1516. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
